

# TRUCK-BEDZ ZZZ

**Transform your pickup truck or SUV's cargo area into a full size comfortable sleeping bedroom for two with our full thickness, custom fitted, incredibly rugged and supportive, urethane laminated nylon cloth air bed from Truck-Bedz.**

## **Why Cloth beds versus Vinyl beds? We're glad you asked...**

- Truck-bedz Expedition series are the **ONLY** urethane laminated nylon cloth full size mattresses available on the market today **without a single drop of vinyl or PVC found anywhere in the product.**
- Truck-bedz are the **ONLY** mattress on the market **designed to fit all pickup trucks and SUV's** with natural, gentle contours that wrap around the wheel wells to provide a full size, full thickness mattress for a good night's sleep outdoors.
- Truck-bedz urethane laminated nylon cloth airbeds do not release toxic poison phthalates and dioxins into our planets environment like EVERY vinyl and vinyl fabric air bed does. That 'vinyl' smell on other air beds includes these very same poisonous chemical elements, right next to your nose.
- Truck-bedz urethane laminated nylon cloth airbeds are a stiff heavy duty 420 denier old fashioned backpack style cloth coated with a thick urethane layer that is absorbed by the fabric and is then radio frequency welded into the shapes necessary to fit your vehicle. This robust material construction while more expensive and far more difficult to produce, does not puncture easily like all lesser quality 'film' vinyl air beds.
- Truck-bedz urethane laminated nylon cloth mattresses are by far the 'Greenest' air mattresses available on the market today. While urethane too is an oil derived product, the byproducts of its manufacture, use and disposal are miniscule compared to the dangerous poisons produced with EVERY vinyl film, laminated vinyl and vinyl fabric product, particularly vinyl air beds.
- Truck-bedz Expedition series urethane laminated nylon cloth airbeds have a **4,000 lb. weight rating** compared to the 450-650 lb. maximum weight rating of ALL vinyl mattresses including Coleman and Aerobed and our own Weekender models.
- Truck-bedz urethane laminated nylon cloth airbeds have been tested below 0°F and do not get brittle or crack in cold weather like all lesser quality vinyl air beds some of which can crack in temperatures as high as 40 degrees. It's often less than 40 where we camp.
- Truck-bedz urethane laminated nylon cloth airbeds do not smell offensive like a kiddie swimming pool plastic and like ALL 'Eco-Hostile'™ vinyl and vinyl fabric air beds do.
- Truck-bedz urethane laminated nylon cloth airbeds are extraordinarily abrasion resistant unlike like low quality vinyl air beds. Check out our YouTube videos where we demonstrate motorcycles and trucks trampling them repeatedly but they still hold air.

- Truck-bedz Expedition series feature RF welded, 420-denier urethane laminated nylon backpack cloth construction which resists punctures, withstands harsh weather, repeated abrasion and can withstand extreme 4 season temperatures unlike ANY vinyl airbed.
- Truck-bedz urethane laminated nylon cloth airbeds are the only full size inflatable air mattresses capable with withstanding the real world rigors of Mother Nature's typically hostile environment. If it's only vinyl material then it's **NOT** 'all terrain' or 'super tough' despite marketing claims to the contrary.
- Truck-bedz urethane laminated nylon cloth airbeds do not suffer from 'microporosity' like all vinyl beds. Microporosity is simply lots of tiny bubbles in the wall of the vinyl plastic film which cause leaks through the walls as well as through the vinyl seams.
- Truck-bedz urethane laminated nylon cloth airbeds are fun to jump on. Extreme abuse, driving upon them, using them to wear out eight year olds, or using them for other purposes while being loads of fun, these activities may not be covered under our industry leading MFR 2 year warranty. Do not jump or even step on vinyl beds with shoes on unless you want to buy another bed.
- Truck-bedz urethane laminated nylon cloth airbeds offer portability, light weight and the comfort and support of a full 8" thickness home mattress without the unreliability of a lesser vinyl air mattresses
- Truck-bedz urethane laminated nylon cloth airbeds are so durable that sweeping away every little small twig, pebbles, tie down straps, screwdriver and truck cargo box debris isn't necessary. Vinyl mattresses of any variety simply can't boast this durability
- Truck-bedz urethane laminated nylon cloth airbeds offer our 'Linear Beam' layout which provides consistent support as well as providing maximum floor coverage.
- Truck-bedz uses 2 highly reliable high-volume, two stage "Boston" boat valves to provide the comfort of knowing they are totally secure to hold air. Boat valves cost more because they are worth it. And two valves allow for more rapid deflation while preventing air from getting caught in an odd corner.
- Truck-bedz urethane laminated nylon cloth airbeds are compatible with unlined pickup beds or drop-in liners and spray-in liners. Vinyl airbeds can NOT be used with any sprayed on textured linings for even a single use.
- Truck-bedz urethane laminated nylon cloth airbeds include our Wedge shaped carry bag which is designed to fit nicely behind the seat of your vehicle, and unlike many other 'stuff sacks' where you can't fit the product back in once it's unrolled, our Wedge Bag is voluminous enough to hold up to two Truck-bedz and a pump easily so your not going to work hard to put everything away even if you're in a hurry to break camp.
- All Truck-bedz includes our powerful +12VDC air pump and of course our pump works in both directions and provides for faster inflation and deflation in about a minute in either direction. We do not build the pump into the bed because we don't want a \$5 pump failure to spoil your Truck-bedz.
- Truck-bedz spends the extra quarter here and there on purpose to bring superior outdoor sleeping products to the marketplace. We feel that 'You get what you pay for' and precisely all of the corners cut making vinyl beds cheaper are exactly why people are tired of cheaper, failure prone, 'Eco-hostile'™ vinyl products. Truck-bedz urethane laminated nylon cloth airbeds provide real world tough solutions for sleeping in full thickness comfort with or without your vehicle outdoors
